Still needed: three items, and what to send if they cannot be found

2026-11-01 | every DOI below was opened against a Crossref record today. Full table with ISBNs and verification notes: one-click CSV

Nothing else is needed. Ten of the thirteen books arrived and are usable. Two of the earlier deliveries did not count: **Eringen and Maugin** came as a **one-page review** of the book (no equations), and **Povstenko** came as **Chapter 1 only** (11 pages). Achenbach never arrived. Rows 2, 3, 5, 6, 8 and 9 below are substitutes - send one per need, not all of them.

need	role	book	DOI	ISBN
BK-15	primary	**Electrodynamics of Continua I: Foundations and Solid Media** Eringen, A. C. and Maugin, G. A., Springer New York, 1990	10.1007/978-1-4612-3226-1	9781461279235
BK-15	alternative	**Electrodynamics of Continua II** Eringen, A. C. and Maugin, G. A., Springer New York, 1990	10.1007/978-1-4612-3236-0	9781461279280
BK-15	alternative	**Continuum Mechanics of Electromagnetic Solids** Maugin, G. A., Elsevier (North-Holland), 1988	10.1016/c2009-0-08748-0	9780444703996
frac. thermoelasticity	primary	**Fractional Thermoelasticity** Povstenko, Y., Springer International Publishing, 2015	10.1007/978-3-319-15335-3	9783319153346
frac. thermoelasticity	alternative	**Fractional Thermoelasticity (Second Edition)** Povstenko, Y., Springer International Publishing, 2024	10.1007/978-3-031-64587-7	9783031645860
frac. thermoelasticity	alternative	**Linear Fractional Diffusion-Wave Equation for Scientists and Engineers** Povstenko, Y., Springer International Publishing, 2015	10.1007/978-3-319-17954-4	9783319179537
optional	primary	**Wave Propagation in Elastic Solids** Achenbach, J. D., North-Holland (Elsevier), 1973	10.1016/c2013-0-04485-4	9780720423679
optional	alternative	**The Theory of Elastic Waves and Waveguides** Miklowitz, J., North-Holland (Elsevier), 1978	10.1016/c2009-0-08749-2	9780444875136
optional	alternative	**Wave Motion in Elastic Solids** Graff, K. F., Ohio State University Press (also reprinted by Dover), 1975	no DOI recorded	-

Why the first item matters most: BK-15 is six multifield atlas cases that have no invariant by design, because inventing a coupled electro-magneto-elastic law would produce numbers about no real material. Any of the first three books supplies the law, and atlas coverage goes **34/40 to 40/40**.

Two honest wrinkles. Volume II and Maugin 1988 carry the same constitutive equations as Volume I, so they substitute - but if Volume I can be found, send that, because it is what a citation would name. **Graff 1975 has no Crossref book record at all**: the only Crossref hit for that title is a 1979 book review, which must never be cited as the book, so that row carries *no DOI recorded* and nothing else.
