Sources still needed - titles, DOIs, and what the check found

48 works, one row each, de-duplicated. Titles are the ones the record itself carries (Crossref for a DOI, the title page for a book); **44 of the 48 rows carry a title**, and the 4 that do not say so plainly instead of inventing one. Of the 38 DOIs, **38 resolve to the cited work**; 10 works have no DOI (older papers and books) - for those, the journal, volume and pages in the small print under the title are what a library needs.

Nothing here is already in hand. The 41-80 batch sent on 2026-11-01 was taken in and closed: 31 of its works were opened, identified on their own first page and struck off the list - they free 31 blocked claims. The numbers 41, 42, 43, 49, 61, 70, 73 and 74 were not in the batch, so those eight rows still appear below. One further row, the second "van der Merwe, van Rensburg and Sieberhagen 2021" entry, has been retired as a duplicate: its DOI resolves to an unrelated graph-theory paper and the file supplied under that number was that unrelated paper.

If only a few more can be sent, start with these three: (1) **Tzou 1997**, *Macro- to Microscale Heat Transfer: The Lagging Behavior*, CRC Press - the one book left on the list, and two blocked claims hang on it (CR002, CR112); (2) **Singh, Sarkar and Pal 2020**, *Temperature-rate-dependent thermoelasticity theory with memory-dependent derivative*, J. Heat Transfer 142, DOI 10.1115/1.4047510 (CR210) - it was number 61 of the last batch and was not in it; (3) **Chirita, Ciarletta and Tibullo 2017**, DOI 10.1016/j.ijheatmasstransfer.2017.06.071 - it sits above this batch, so it has not been sent yet.

#	Title, then the citation as the manuscript carries it	DOI	checked
1	**Fractional differential equations** Podlubny 1999 (bibliography key Podlubny1999; the manuscript entry itself is empty - from general knowledge, not verified, this is Podlubny, Fractional Differential Equations, Academic Press 1999; confirm the title before ordering)	*none*	-
2	**Generalized mathematical novel model of thermoelastic diffusion with four phase lags and higher-order time derivative** Abouelregal, A. E. (2020), Generalized mathematical novel model of thermoelastic diffusion with four phase lags, European Physical Journal Plus 135:263	10.1140/epjp/s13360-020-00282-2	yes
3	**The theory of thermoelasticity with a memory-dependent dynamic response for a thermo-piezoelectric functionally graded rotating rod** Abouelregal, A. E., Askar, S. S., Marin, M. and Mohamed, B. (2023), The theory of thermoelasticity with a memory-dependent dynamic response for a thermo-piezoelectric functionally graded rotating rod, Scientific Reports 13:36371	10.1038/s41598-023-36371-2	yes
4	**A generalized heat conduction model of higher-order time derivatives and three-phase-lags for non-simple thermoelastic materials** Abouelregal, A. E., Khalil, K. M., Mohammed, F. A. and Nasr, M. E. (2020), A generalized heat conduction model of higher-order time derivatives and three-phase lags, Scientific Reports 10:13625	10.1038/s41598-020-70388-1	yes
5	**Generalized thermoelasticity based on higher-order memory-dependent derivative with time delay** Abouelregal, Moustapha, Nofal, Rashid and Ahmad 2021 (Results in Physics 20)	10.1016/j.rinp.2020.103705	yes
6	**Second sound in solid helium** Ackerman et al. 1966 (Phys. Rev. Lett. 16, 789)	10.1103/physrevlett.16.789	yes
7	**The effect of a hyperbolic two-temperature model with and without energy dissipation in a semiconductor material** Alzahrani, F. and Abbas, I. (2020), The effect of a hyperbolic two-temperature model with and without energy dissipation, Mathematics 8:1711	10.3390/math8101711	yes
8	**Gradient elasticity theories in statics and dynamics - a unification of approaches** Askes and Aifantis 2006 (Int. J. Fracture 139)	10.1007/s10704-006-8375-4	yes
9	**Gradient elasticity in statics and dynamics: an overview of formulations, length scale identification procedures, finite element implementations and new results** Askes and Aifantis 2011 (Int. J. Solids Struct. 48)	10.1016/j.ijsolstr.2011.03.006	yes
10	**Existence of a generalized solution in thermoelasticity with one relaxation time** Bem 1982 (J. Thermal Stresses 5, 195-206)	10.1080/01495738208942145	yes
11	**Existence of a generalized solution in thermoelasticity with two relaxation times, part II** Bem 1983 (J. Thermal Stresses 6, 281-299)	10.1080/01495738308942183	yes
12	**Surface waves in piezothermoelastic transversely isotropic layer lying over piezothermoelastic transversely isotropic half-space** Biswas 2020 (Acta Mechanica 232)	10.1007/s00707-020-02848-8	yes
13	**Theory of thermal stresses** Boley and Weiner 1960 (Theory of Thermal Stresses)	*none*	-

#	Title, then the citation as the manuscript carries it	DOI	checked
14	*title not asserted* Born and von Karman 1912 (Physikalische Zeitschrift 13)	*none*	-
15	**Femtosecond electronic heat-transport dynamics in thin gold films** Brorson, Fujimoto and Ippen 1987 (Phys. Rev. Lett. 59)	10.1103/PhysRevLett.59.1962	yes
16	**Linear models of dissipation whose Q is almost frequency independent - II** Caputo, M. (1967), Linear models of dissipation whose Q is almost frequency independent-II, Geophysical Journal International 13:529-539	10.1111/j.1365-246X.1967.tb02303.x	yes
17	**Linear thermoelasticity** Carlson 1972 (Linear thermoelasticity, Handbuch der Physik VIa/2, 297-345)	*none*	-
18	**Sulla conduzione del calore** Cattaneo 1948	*none*	-
19	**A temperature-rate-dependent theory of thermopiezoelectricity** Chandrasekharaiah 1984 (J. Thermal Stresses 7)	10.1080/01495738408942213	yes
20	**Complete solutions in the theory of thermoelasticity without energy dissipation** Chandrasekharaiah 1997 (Mech. Res. Comm. 24, 625-630)	10.1016/s0093-6413(97)00080-3	yes
21	**On the thermomechanical consistency of the time differential dual-phase-lag models of heat conduction** Chirita, S., Ciarletta, M. and Tibullo, V. (2017), On the thermomechanical consistency of the time differential dual-phase-lag model, International Journal of Heat and Mass Transfer 114:277-285	10.1016/j.ijheatmasstransfer.2017.06.071	yes
22	**A theory of micropolar thermoelasticity without energy dissipation** Ciarletta 1999 (J. Thermal Stresses 22, 581-594)	10.1080/014957399280760	yes
23	*title not asserted* Danilovskaya 1950 (Prikl. Mat. Mekh. 14)	*none*	-
24	**Reflection of generalized thermoelastic waves from isothermal and insulated boundaries of a half space** Das, Lahiri, Sarkar and Basu 2008 (Comput. Math. Appl. 56)	10.1016/j.camwa.2008.05.042	yes
25	**An improved method for numerical inversion of Laplace transforms** de Hoog, Knight and Stokes 1982 (SIAM J. Sci. Stat. Comput. 3)	10.1137/0903022	yes
26	**Numerical inversion of Laplace transforms by relating them to the finite Fourier cosine transform** Dubner and Abate 1968 (J. ACM 15)	10.1145/321439.321446	yes
27	**Numerical inversion of Laplace transforms: an efficient improvement to Dubner and Abate's method** Durbin 1974 (The Computer Journal 17)	10.1093/comjnl/17.4.371	yes
28	**Microcontinuum field theories** Eringen 1999 (Microcontinuum Field Theories, book)	10.1007/978-1-4612-0555-5	yes
29	**Electro-thermoelasticity theory with memory-dependent derivative heat transfer** Ezzat, M. A., El-Karamany, A. S. and El-Bary, A. A. (2016), Electro-thermoelasticity theory with memory-dependent derivative heat transfer, International Journal of Engineering Science	10.1016/j.ijengsci.2015.10.011	yes
30	**Modeling of memory-dependent derivative in generalized thermoelasticity** Ezzat, M. A., El-Karamany, A. S. and El-Bary, A. A. (2016), Modeling of memory-dependent derivative in generalized thermoelasticity, European Physical Journal Plus	10.1140/epjp/i2016-16372-3	yes
31	**On dual-phase-lag thermoelasticity theory with memory-dependent derivative** Ezzat, M. A., El-Karamany, A. S. and El-Bary, A. A. (2016), On dual-phase-lag thermoelasticity theory with memory-dependent derivative, Mechanics of Advanced Materials and Structures	10.1080/15376494.2016.1196793	yes
32	**Generalized fractional thermoelasticity associated with two relaxation times** Hamza, F., Abdou, M. and Abd El-Latief, A. M. (2014), Generalized fractional thermoelasticity associated with two relaxation times, Journal of Thermal Stresses 37:1080-1098	10.1080/01495739.2014.936196	yes
33	**Generalized thermoelasticity** Hetnarski and Ignaczak 1999 (J. Thermal Stresses 22)	10.1080/014957399280832	yes
34	**A method for the numerical inversion of Laplace transforms** Honig and Hirdes 1984 (J. Comput. Appl. Math. 10)	10.1016/0377-0427(84)90075-x	yes
35	**On the theory of thermoelasticity without energy dissipation** Iesan 1998 (J. Thermal Stresses 21, 295-307)	10.1080/01495739808956148	yes
36	**Domain of influence in thermoelasticity with one relaxation time** Ignaczak and Bialy 1980 (J. Thermal Stresses 3, 391-399)	10.1080/01495738008926977	yes
37	**Addendum to the paper "Heat waves" [Rev. Mod. Phys. 61, 41 (1989)]** Joseph and Preziosi 1990 (Rev. Mod. Phys. 62, 375)	10.1103/revmodphys.62.375	yes
38	**Nonhomogeneous dual-phase-lag heat conduction problem: analytical solution and select case studies** Julius, S., Leizeronok, B. and Cukurel, B. (2017), Nonhomogeneous dual-phase-lag heat conduction problem: analytical solution, Journal of Heat Transfer	10.1115/1.4037775	yes

#	Title, then the citation as the manuscript carries it	DOI	checked
39	**Hyperbolic heat conduction equation for materials with a nonhomogeneous inner structure** Kaminski 1990 (J. Heat Transfer 112, 555-560)	10.1115/1.2910422	yes
40	**Reflection and refraction of plane harmonic waves at an interface between elastic solid and magneto-thermoelastic diffusion solid with voids** Kumar and Kansal 2017 (Comput. Methods Sci. Technol. 23)	10.12921/cmst.2016.0000036	yes
41	**Rayleigh-type waves in nonlocal micropolar thermoelastic half-space containing void pores** Kumar and Tomar 2024 (J. Elasticity 156)	10.1007/s10659-024-10079-4	yes
42	*title not asserted* Kumar, Devi and Sharma 2017 (Appl. Appl. Math. Int. J.)	*none*	-
43	**Response of memory to the imperfect fluid-double porous non-local thermoelastic solid interface** Kumar, Gupta, Pathania and Barak 2025 (J. Information and Optimization Sciences 46)	10.47974/JIOS-1608	yes
44	**Thermoelasticity** Nowacki 1975 (Thermoelasticity, Pergamon)	*none*	-
45	**Temperature-rate-dependent thermoelasticity theory with memory-dependent derivative: energy, uniqueness theorems, and variational principle** Singh, Sarkar and Pal 2020 (J. Heat Transfer 142)	10.1115/1.4047510	yes
46	**Macro- to microscale heat transfer: the lagging behavior** Tzou, D. Y. (1997), Macro-to-microscale heat transfer: the lagging behavior (book)	*none*	-
47	*title not asserted* Vernotte 1958	*none*	-
48	**Memory-dependent derivative versus fractional derivative (IV): space-dependent derivative for unsteady heat diffusion** Wang, J.-L. and Li, H.-F. (2025), Memory-dependent derivative versus fractional derivative (IV): space-dependent..., Fractal and Fractional 9:794	10.3390/fractalfract9120794	yes

Where the check found something to fix or to know

#1 Podlubny 1999 (bibliography key Podlubny1999; the manuscript entry itself is empty - from general knowledge, n. the manuscript bibliography entry carries no title; the title here is from general knowledge, not verified, and Crossref returned no book record for it

#6 Ackerman et al. 1966 (Phys. Rev. Lett. 16, 789). DOI found by Crossref bibliographic search this pass: Physical Review Letters 16, 789-791 (1966) matches the register on journal, volume and page

#10 Bem 1982 (J. Thermal Stresses 5, 195-206). Crossref spells the author Bem for the 1982 paper and Bern for the 1983 one

#13 Boley and Weiner 1960 (Theory of Thermal Stresses). book; the title is confirmed by the 1961 review records in Crossref (J. Appl. Mech. 28, 318), the book itself has no DOI

#14 Born and von Karman 1912 (Physikalische Zeitschrift 13). no Crossref record could be matched; no title is asserted here

#17 Carlson 1972 (Linear thermoelasticity, Handbuch der Physik VIa/2, 297-345). Crossref holds the chapter as DOI 10.1007/978-3-662-39776-3_2, pages 297-345, but dates it 1973 against the register's 1972 - confirm which printing is meant

#18 Cattaneo 1948. title taken from the 2011 reprint record (DOI 10.1007/978-3-642-11051-1_5); the 1948 original in Atti Semin. Mat. Fis. Univ. Modena has no DOI

#23 Danilovskaya 1950 (Prikl. Mat. Mekh. 14). no Crossref record could be matched; no title is asserted here

#37 Joseph and Preziosi 1990 (Rev. Mod. Phys. 62, 375). resolves to "Addendum to the paper Heat waves", Rev. Mod. Phys. 62, 375-391 - the review itself is Rev. Mod. Phys. 61, 41 (1989), DOI 10.1103/RevModPhys.61.41

#39 Kaminski 1990 (J. Heat Transfer 112, 555-560). DOI found by Crossref bibliographic search this pass: J. Heat Transfer 112, 555-560 (1990) matches exactly

#42 Kumar, Devi and Sharma 2017 (Appl. Appl. Math. Int. J.). no Crossref record could be matched; no title is asserted here

#44 Nowacki 1975 (Thermoelasticity, Pergamon). book; Crossref holds chapter-level DOIs for the Pergamon Thermoelasticity dated 1986, so no book DOI is asserted

#47 Vernotte 1958. no Crossref record could be matched; no title is asserted here

What the 2026-11-01 batch changed. 31 works were received, opened and identified on their own first page: Lifshitz and Roukes (PRB 61, 5600), Luchko, McNelly et al. (PRL 24, 100), Mindlin 1974 (IJSS 10, 625), Muller (ARMA 26, 118), Nowacki 1978 (JTS 1:2), Pennes 1948, Polizzotto 2001, Povstenko 2011 (JTS 34, 51), Quintanilla 1999 and 2002, Sarkar/Banerjee/Shaw, Scott 2008, Shaw 2019, Sherief and Raslan, Sherief/El-Sayed/Abd El-Latief (IJSS 47, 269), Stehfest (CACM 13, 47), Stroh 1958 and 1962, Suh and Burger, Sur and Kanoria, Thomsen et al., Tiwari and Mukhopadhyay 2014 and 2015, van der Merwe et al. (AMC 396, 125934), Xu and Jiang, Youssef 2010, Youssef and Al-Lehaibi, Yu/Xue/Tian, Yu and Deng, Yu/Hu/Tian. Nothing was taken on trust from the file name: each was matched on the journal, volume and page or the DOI printed on the page.

How the titles and DOIs were checked. Every DOI was queried against the Crossref REST API on 2026-11-01; the title printed here is the one Crossref returns for that DOI, and "yes" means the record is the work named in the small citation line. Where a page

range, a year or an author spelling differs from the manuscript, the note on that row records it rather than overwriting it.
