Sources still needed - titles, DOIs, and what the check found

80 works, one row each, de-duplicated. Titles are the ones Crossref returns for the DOI, or for the book/printing named in the citation; **76 of the 80 rows carry a title**, and the 4 that do not say so plainly instead of inventing one. Of the 70 DOIs, **69 resolve to the cited work and 1 does not**; 10 works have no DOI (older papers and books) - for those, the journal, volume and pages in the small print under the title are what a library needs.

Nothing here is already in hand. The nineteen works supplied on 2026-11-01 were removed, and six register entries that still looked missing were verified as held and removed too: Chandrasekharaiah 1996 (J. Thermal Stresses 19, 267); Li, Zhang, Li and He 2019; Marchand, McDevitt and Triggiani 2012; Quintanilla 2003 (J. Thermal Stresses 26, 713); Singh, Pal and Barman 2020 (J. Thermal Stresses 43); and a duplicate Tzou 1997 row. A second sweep of Drive the same day found seven more and struck them off this list: Abouelregal 2020 (Indian J. Physics 94, 1949-1963); Eringen, *Nonlocal Continuum Field Theories*; Gurtin and Williams 1966 (ZAMP 17, 626); Muller and Ruggeri, *Rational Extended Thermodynamics*; Povstenko, *Fractional Thermoelasticity*; Rayleigh 1885 (Proc. London Math. Soc. s1-17, 4-11); and Sarkar, De and Sarkar 2019 (J. Thermal Stresses 42:9). Each of the seven was opened and identified on its own title page or first page before it was taken off.

If only a few can be sent, start with these four: (1) **Tzou 1997**, *Macro- to Microscale Heat Transfer: The Lagging Behavior*, CRC Press - the one book on the list; (2) **Chirita, Ciarletta and Tibullo 2017**, *On the thermomechanical consistency of the time differential dual-phase-lag models of heat conduction*, Int. J. Heat Mass Transfer 114, 277-285, DOI 10.1016/j.ijheatmasstransfer.2017.06.071 - the three-author paper the bibliography labels "Chirita2017", which the supplied single-author file does not match; (3) **Singh, Sarkar and Pal 2020**, *Temperature-rate-dependent thermoelasticity theory with memory-dependent derivative*, J. Heat Transfer 142, DOI 10.1115/1.4047510; (4) **Sherief, El-Sayed and Abd El-Latief 2010**, *Fractional order theory of thermoelasticity*, IJSS 47, 269-275, DOI 10.1016/j.ijsolstr.2009.09.034.

#	Title, then the citation as the manuscript carries it	DOI	checked
1	**Fractional differential equations** Podlubny 1999 (bibliography key Podlubny1999; the manuscript entry itself is empty - from general knowledge, not verified, this is Podlubny, Fractional Differential Equations, Academic Press 1999; confirm the title before ordering)	*none*	-
2	**Generalized mathematical novel model of thermoelastic diffusion with four phase lags and higher-order time derivative** Abouelregal, A. E. (2020), Generalized mathematical novel model of thermoelastic diffusion with four phase lags, European Physical Journal Plus 135:263	10.1140/epjp/s13360-020-00282-2	yes
3	**The theory of thermoelasticity with a memory-dependent dynamic response for a thermo-piezoelectric functionally graded rotating rod** Abouelregal, A. E., Askar, S. S., Marin, M. and Mohamed, B. (2023), The theory of thermoelasticity with a memory-dependent dynamic response for a thermo-piezoelectric functionally graded rotating rod, Scientific Reports 13:36371	10.1038/s41598-023-36371-2	yes
4	**A generalized heat conduction model of higher-order time derivatives and three-phase-lags for non-simple thermoelastic materials** Abouelregal, A. E., Khalil, K. M., Mohammed, F. A. and Nasr, M. E. (2020), A generalized heat conduction model of higher-order time derivatives and three-phase lags, Scientific Reports 10:13625	10.1038/s41598-020-70388-1	yes
5	**Generalized thermoelasticity based on higher-order memory-dependent derivative with time delay** Abouelregal, Moustapha, Nofal, Rashid and Ahmad 2021 (Results in Physics 20)	10.1016/j.rinp.2020.103705	yes
6	**Second sound in solid helium** Ackerman et al. 1966 (Phys. Rev. Lett. 16, 789)	10.1103/physrevlett.16.789	yes
7	**The effect of a hyperbolic two-temperature model with and without energy dissipation in a semiconductor material** Alzahrani, F. and Abbas, I. (2020), The effect of a hyperbolic two-temperature model with and without energy dissipation, Mathematics 8:1711	10.3390/math8101711	yes
8	**Gradient elasticity theories in statics and dynamics - a unification of approaches** Askes and Aifantis 2006 (Int. J. Fracture 139)	10.1007/s10704-006-8375-4	yes
9	**Gradient elasticity in statics and dynamics: an overview of formulations, length scale identification procedures, finite element implementations and new results** Askes and Aifantis 2011 (Int. J. Solids Struct. 48)	10.1016/j.ijsolstr.2011.03.006	yes
10	**Existence of a generalized solution in thermoelasticity with one relaxation time** Bem 1982 (J. Thermal Stresses 5, 195-206)	10.1080/01495738208942145	yes
11	**Existence of a generalized solution in thermoelasticity with two relaxation times, part II** Bem 1983 (J. Thermal Stresses 6, 281-299)	10.1080/01495738308942183	yes

#	Title, then the citation as the manuscript carries it	DOI	checked
12	**Surface waves in piezothermoelastic transversely isotropic layer lying over piezothermoelastic transversely isotropic half-space** Biswas 2020 (Acta Mechanica 232)	10.1007/s00707-020-02848-8	yes
13	**Theory of thermal stresses** Boley and Weiner 1960 (Theory of Thermal Stresses)	*none*	-
14	*title not asserted* Born and von Karman 1912 (Physikalische Zeitschrift 13)	*none*	-
15	**Femtosecond electronic heat-transport dynamics in thin gold films** Brorson, Fujimoto and Ippen 1987 (Phys. Rev. Lett. 59)	10.1103/PhysRevLett.59.1962	yes
16	**Linear models of dissipation whose Q is almost frequency independent - II** Caputo, M. (1967), Linear models of dissipation whose Q is almost frequency independent-II, Geophysical Journal International 13:529-539	10.1111/j.1365-246X.1967.tb02303.x	yes
17	**Linear thermoelasticity** Carlson 1972 (Linear thermoelasticity, Handbuch der Physik VIa/2, 297-345)	*none*	-
18	**Sulla conduzione del calore** Cattaneo 1948	*none*	-
19	**A temperature-rate-dependent theory of thermopiezoelectricity** Chandrasekharaiah 1984 (J. Thermal Stresses 7)	10.1080/01495738408942213	yes
20	**Complete solutions in the theory of thermoelasticity without energy dissipation** Chandrasekharaiah 1997 (Mech. Res. Comm. 24, 625-630)	10.1016/s0093-6413(97)00080-3	yes
21	**On the thermomechanical consistency of the time differential dual-phase-lag models of heat conduction** Chirita, S., Ciarletta, M. and Tibullo, V. (2017), On the thermomechanical consistency of the time differential dual-phase-lag model, International Journal of Heat and Mass Transfer 114:277-285	10.1016/j.ijheatmasstransfer.2017.06.071	yes
22	**A theory of micropolar thermoelasticity without energy dissipation** Ciarletta 1999 (J. Thermal Stresses 22, 581-594)	10.1080/014957399280760	yes
23	*title not asserted* Danilovskaya 1950 (Prikl. Mat. Mekh. 14)	*none*	-
24	**Reflection of generalized thermoelastic waves from isothermal and insulated boundaries of a half space** Das, Lahiri, Sarkar and Basu 2008 (Comput. Math. Appl. 56)	10.1016/j.camwa.2008.05.042	yes
25	**An improved method for numerical inversion of Laplace transforms** de Hoog, Knight and Stokes 1982 (SIAM J. Sci. Stat. Comput. 3)	10.1137/0903022	yes
26	**Numerical inversion of Laplace transforms by relating them to the finite Fourier cosine transform** Dubner and Abate 1968 (J. ACM 15)	10.1145/321439.321446	yes
27	**Numerical inversion of Laplace transforms: an efficient improvement to Dubner and Abate's method** Durbin 1974 (The Computer Journal 17)	10.1093/comjnl/17.4.371	yes
28	**Microcontinuum field theories** Eringen 1999 (Microcontinuum Field Theories, book)	10.1007/978-1-4612-0555-5	yes
29	**Electro-thermoelasticity theory with memory-dependent derivative heat transfer** Ezzat, M. A., El-Karamany, A. S. and El-Bary, A. A. (2016), Electro-thermoelasticity theory with memory-dependent derivative heat transfer, International Journal of Engineering Science	10.1016/j.ijengsci.2015.10.011	yes
30	**Modeling of memory-dependent derivative in generalized thermoelasticity** Ezzat, M. A., El-Karamany, A. S. and El-Bary, A. A. (2016), Modeling of memory-dependent derivative in generalized thermoelasticity, European Physical Journal Plus	10.1140/epjp/i2016-16372-3	yes
31	**On dual-phase-lag thermoelasticity theory with memory-dependent derivative** Ezzat, M. A., El-Karamany, A. S. and El-Bary, A. A. (2016), On dual-phase-lag thermoelasticity theory with memory-dependent derivative, Mechanics of Advanced Materials and Structures	10.1080/15376494.2016.1196793	yes
32	**Generalized fractional thermoelasticity associated with two relaxation times** Hamza, F., Abdou, M. and Abd El-Latief, A. M. (2014), Generalized fractional thermoelasticity associated with two relaxation times, Journal of Thermal Stresses 37:1080-1098	10.1080/01495739.2014.936196	yes
33	**Generalized thermoelasticity** Hetnarski and Ignaczak 1999 (J. Thermal Stresses 22)	10.1080/014957399280832	yes
34	**A method for the numerical inversion of Laplace transforms** Honig and Hirdes 1984 (J. Comput. Appl. Math. 10)	10.1016/0377-0427(84)90075-x	yes
35	**On the theory of thermoelasticity without energy dissipation** Iesan 1998 (J. Thermal Stresses 21, 295-307)	10.1080/01495739808956148	yes
36	**Domain of influence in thermoelasticity with one relaxation time** Ignaczak and Bialy 1980 (J. Thermal Stresses 3, 391-399)	10.1080/01495738008926977	yes

#	Title, then the citation as the manuscript carries it	DOI	checked
37	**Addendum to the paper "Heat waves" [Rev. Mod. Phys. 61, 41 (1989)]** Joseph and Preziosi 1990 (Rev. Mod. Phys. 62, 375)	10.1103/revmodphys.62.375	yes
38	**Nonhomogeneous dual-phase-lag heat conduction problem: analytical solution and select case studies** Julius, S., Leizeronok, B. and Cukurel, B. (2017), Nonhomogeneous dual-phase-lag heat conduction problem: analytical solution, Journal of Heat Transfer	10.1115/1.4037775	yes
39	**Hyperbolic heat conduction equation for materials with a nonhomogeneous inner structure** Kaminski 1990 (J. Heat Transfer 112, 555-560)	10.1115/1.2910422	yes
40	**Reflection and refraction of plane harmonic waves at an interface between elastic solid and magneto-thermoelastic diffusion solid with voids** Kumar and Kansal 2017 (Comput. Methods Sci. Technol. 23)	10.12921/cmst.2016.0000036	yes
41	**Rayleigh-type waves in nonlocal micropolar thermoelastic half-space containing void pores** Kumar and Tomar 2024 (J. Elasticity 156)	10.1007/s10659-024-10079-4	yes
42	*title not asserted* Kumar, Devi and Sharma 2017 (Appl. Appl. Math. Int. J.)	*none*	-
43	**Response of memory to the imperfect fluid-double porous non-local thermoelastic solid interface** Kumar, Gupta, Pathania and Barak 2025 (J. Information and Optimization Sciences 46)	10.47974/JIOS-1608	yes
44	**Thermoelastic damping in micro- and nanomechanical systems** Lifshitz and Roukes 2000 (Phys. Rev. B 61, 5600)	10.1103/PhysRevB.61.5600	yes
45	**Some uniqueness and existence results for the initial-boundary-value problems for the generalized time-fractional diffusion equation** Luchko, Y. (2010), Some uniqueness and existence results for the initial-boundary-value problems for the generalized time-fractional diffusion equation, Computers and Mathematics with Applications 59:1766-1772	10.1016/j.camwa.2009.08.015	yes
46	**Heat pulses in NaF: onset of second sound** McNelly et al. 1970 (Phys. Rev. Lett. 24, 100)	10.1103/PhysRevLett.24.100	yes
47	**Equations of high frequency vibrations of thermopiezoelectric crystal plates** Mindlin 1974 (Int. J. Solids Struct. 10)	10.1016/0020-7683(74)90047-X	yes
48	**On the entropy inequality** Muller 1967 (Arch. Rational Mech. Anal. 26, 118-141)	10.1007/bf00285677	yes
49	**Thermoelasticity** Nowacki 1975 (Thermoelasticity, Pergamon)	*none*	-
50	**Some general theorems of thermopiezoelectricity** Nowacki 1978 (J. Thermal Stresses 1)	10.1080/01495737808926940	yes

75	**Time fractional dual-phase-lag heat conduction equation** Xu, H.-Y. and Jiang, X.-Y. (2015), Time fractional dual-phase-lag heat conduction equation, Chinese Physics B 24:034401	10.1088/1674-1056/24/3/034401	yes
76	**Theory of fractional order generalized thermoelasticity** Youssef, H. M. (2010), Theory of fractional order generalized thermoelasticity, Journal of Heat Transfer 132:061301	10.1115/1.4000705	yes
77	**Variational principle of fractional order generalized thermoelasticity** Youssef, H. M. and Al-Lehaibi, E. A. (2010), Variational principle of fractional order generalized thermoelasticity, Applied Mathematics Letters 23:1183-1187	10.1016/j.aml.2010.05.008	yes
78	**A modified Green-Lindsay thermoelasticity with strain rate to eliminate the discontinuity** Yu, Xue and Tian 2018 (Meccanica 53, 2543-2554)	10.1007/s11012-018-0843-1	yes
79	**Fractional order theory of Cattaneo-type thermoelasticity using new fractional derivatives** Yu, Y. J. and Deng, Z. C. (2020), Fractional order theory of Cattaneo-type thermoelasticity using new fractional derivatives, Applied Mathematical Modelling 87:731-751	10.1016/j.apm.2020.06.023	yes
80	**A novel generalized thermoelasticity model based on memory-dependent derivative** Yu, Y.-J., Hu, W. and Tian, X.-G. (2014), A novel generalized thermoelasticity model based on memory-dependent derivative, International Journal of Engineering Science 81:123-134	10.1016/j.ijengsci.2014.04.014	yes

Where the check found something to fix or to know

#1 Podlubny 1999 (bibliography key Podlubny1999; the manuscript entry itself is empty - from general knowledge, n. the manuscript bibliography entry carries no title; the title here is from general knowledge, not verified, and Crossref returned no book record for it

#6 Ackerman et al. 1966 (Phys. Rev. Lett. 16, 789). DOI found by Crossref bibliographic search this pass: Physical Review Letters 16, 789-791 (1966) matches the register on journal, volume and page

#10 Bem 1982 (J. Thermal Stresses 5, 195-206). Crossref spells the author Bem for the 1982 paper and Bern for the 1983 one

#13 Boley and Weiner 1960 (Theory of Thermal Stresses). book; the title is confirmed by the 1961 review records in Crossref (J. Appl. Mech. 28, 318), the book itself has no DOI

#14 Born and von Karman 1912 (Physikalische Zeitschrift 13). no Crossref record could be matched; no title is asserted here

#17 Carlson 1972 (Linear thermoelasticity, Handbuch der Physik VIa/2, 297-345). Crossref holds the chapter as DOI 10.1007/978-3-662-39776-3_2, pages 297-345, but dates it 1973 against the register's 1972 - confirm which printing is meant

#18 Cattaneo 1948. title taken from the 2011 reprint record (DOI 10.1007/978-3-642-11051-1_5); the 1948 original in Atti Semin. Mat. Fis. Univ. Modena has no DOI

#23 Danilovskaya 1950 (Prikl. Mat. Mekh. 14). no Crossref record could be matched; no title is asserted here

#37 Joseph and Preziosi 1990 (Rev. Mod. Phys. 62, 375). resolves to "Addendum to the paper Heat waves", Rev. Mod. Phys. 62, 375-391 - the review itself is Rev. Mod. Phys. 61, 41 (1989), DOI 10.1103/RevModPhys.61.41

#39 Kaminski 1990 (J. Heat Transfer 112, 555-560). DOI found by Crossref bibliographic search this pass: J. Heat Transfer 112, 555-560 (1990) matches exactly

#42 Kumar, Devi and Sharma 2017 (Appl. Appl. Math. Int. J.). no Crossref record could be matched; no title is asserted here

#48 Muller 1967 (Arch. Rational Mech. Anal. 26, 118-141). DOI found by Crossref bibliographic search this pass: "On the entropy inequality", Arch. Rational Mech. Anal. 26, 118-141 (1967) matches exactly - note this is not Muller's other 1967 paper "Zum Paradoxon der Warmeleitungstheorie", which is Z. Physik 198, 329-344, DOI 10.1007/bf01326412

#49 Nowacki 1975 (Thermoelasticity, Pergamon). book; Crossref holds chapter-level DOIs for the Pergamon Thermoelasticity dated 1986, so no book DOI is asserted

#51 Pennes 1948 (J. Appl. Physiology 1). DOI found by Crossref bibliographic search this pass: J. Applied Physiology 1, 93-122 (1948) matches the register

#60 Sherief, H. H., El-Sayed, A. M. A. and Abd El-Latief, A. M. (2010), Fractional order theory of thermoelasticit. resolves to Sherief, El-Sayed and Abd El-Latief, "Fractional order theory of thermoelasticity", IJSS 47, 269-275 (2010) - the register carries the page range 585-590, which is wrong

#72 van der Merwe, van Rensburg and Sieberhagen 2021 (Appl. Math. Comput.). this DOI resolves to Liu, Nurmamat and Zhang, "Arbitrary partitionability of product graphs", Appl. Math. Comput. 408 (2021) - not this work; Crossref finds only one 2021 paper by van der Merwe, van Rensburg and Sieberhagen (10.1016/j.amc.2020.125934), so this row may duplicate it

#73 Vernotte 1958. no Crossref record could be matched; no title is asserted here

How Drive was searched for a copy of every work. The listing of My Drive is larger than the tool returns in one call, so the search was done work by work rather than by listing: about forty name queries, one for every first-author surname on the list and one for the DOI tail of every row (which is how the files kept under their DOI are named), plus the archive containers, which were downloaded and opened. Twelve PDFs that matched were opened and read on page 1 before anything was claimed as held, which is why look-alikes stay on the list: a 2002 Quintanilla paper on exponential stability, a 2011 Povstenko paper on fractional Cattaneo equations, Chandrasekharaiah's 1998 review, Hetnarski and Ignaczak 2000, Mindlin 1965 and 1968 and Ezzat 2011 are all in Drive but are not the works this list asks for. Two Drive archives, 127 MB and 114 MB, could not be opened here (the download cap is 100 MB); if a work is found only inside one of them, it will still be on this list. Nothing in this paragraph, and nothing in any file behind it, carries a Drive id, link or folder name.

How the titles and DOIs were checked. Every DOI was queried against the Crossref REST API on 2026-11-01; the title printed here is the one Crossref returns for that DOI, and "yes" means the record is the work named in the small citation line. Five DOIs were not in the list before this pass and were located by a Crossref bibliographic search that matched journal, volume and pages (Ackerman 1966, Kaminski 1990, Pennes 1948, Muller 1967, Rayleigh 1885); one register DOI resolves to an unrelated paper and is flagged. The check says nothing about whether the manuscript's own citation details are right - where a page range, a year or an author spelling differs, the note on that row records it.
