Sources still needed - complete list, DOIs checked

87 works, one row each, de-duplicated. All 71 DOIs were queried against the Crossref API on 2026-11-01: **70 resolve to the cited work, 1 does not** and is flagged below. 16 works have no DOI recorded - older papers and books - and for those the journal, volume and pages in the citation are the identifier.

Nothing here is already in hand. The nineteen works supplied on 2026-11-01 were removed, and six register entries that still looked missing were verified as held during the same pass and removed too: Chandrasekharaiah 1996 (J. Thermal Stresses 19, 267); Li, Zhang, Li and He 2019; Marchand, McDevitt and Triggiani 2012; Quintanilla 2003 (J. Thermal Stresses 26, 713); Singh, Pal and Barman 2020 (J. Thermal Stresses 43); and a duplicate Tzou 1997 row. So send freely from this list without checking whether it repeats something.

If only a few can be sent, start with these four: (1) **Tzou 1997**, *Macro- to Microscale Heat Transfer: The Lagging Behavior*, CRC Press - the one book on the list; (2) **Chirita, Ciarletta and Tibullo 2017**, Int. J. Heat Mass Transfer 114, 277-285, DOI 10.1016/j.ijheatmasstransfer.2017.06.071 - the three-author paper the bibliography labels "Chirita2017", which the supplied single-author file does not match; (3) **Singh, Sarkar and Pal 2020**, J. Heat Transfer 142, DOI 10.1115/1.4047510; (4) **Sherief, El-Sayed and Abd El-Latief 2010**, IJSS 47, 269-275, DOI 10.1016/j.ijsolstr.2009.09.034. Each of those four closes a gap the audit itself flagged.

#	Work (authors, year, title, where it appeared)	DOI	checked
1	Podlubny 1999 (bibliography key Podlubny1999; the manuscript entry itself is empty - from general knowledge, not verified, this is Podlubny, Fractional Differential Equations, Academic Press 1999; confirm the title before ordering)	*none recorded*	-
2	Abouelregal 2020, Indian Journal of Physics 94 (title not recorded in the ledger; DOI as below)	10.1007/s12648-019-01635-z	yes
3	Abouelregal, A. E. (2020), Generalized mathematical novel model of thermoelastic diffusion with four phase lags, European Physical Journal Plus 135:263	10.1140/epjp/s13360-020-00282-2	yes
4	Abouelregal, A. E., Askar, S. S., Marin, M. and Mohamed, B. (2023), The theory of thermoelasticity with a memory-dependent dynamic response for a thermo-piezoelectric functionally graded rotating rod, Scientific Reports 13:36371	10.1038/s41598-023-36371-2	yes
5	Abouelregal, A. E., Khalil, K. M., Mohammed, F. A. and Nasr, M. E. (2020), A generalized heat conduction model of higher-order time derivatives and three-phase lags, Scientific Reports 10:13625	10.1038/s41598-020-70388-1	yes
6	Abouelregal, Moustapha, Nofal, Rashid and Ahmad 2021 (Results in Physics 20)	10.1016/j.rinp.2020.103705	yes
7	Ackerman et al. 1966 (Phys. Rev. Lett. 16, 789)	*none recorded*	-
8	Alzahrani, F. and Abbas, I. (2020), The effect of a hyperbolic two-temperature model with and without energy dissipation, Mathematics 8:1711	10.3390/math8101711	yes

Where the DOI check found something

#11 Bem 1982 (J. Thermal Stresses 5, 195-206). Crossref spells the author Bem for the 1982 paper and Bern for the 1983 one

#40 Joseph and Preziosi 1990 (Rev. Mod. Phys. 62, 375). resolves to "Addendum to the paper Heat waves", Rev. Mod. Phys. 62, 375-391 - the review itself is Rev. Mod. Phys. 61, 41 (1989), DOI 10.1103/RevModPhys.61.41

#58 Povstenko, Y. Z. (2015), Fractional thermoelasticity (Springer book, ISBN 978-3-319-15334-6). book: Povstenko, "Fractional Thermoelasticity", Springer 2015 - the register dates it 2016

#67 Sherief, H. H., El-Sayed, A. M. A. and Abd El-Latief, A. M. (2010), Fractional order theory of thermoelasticity, International Journal of Solids and Structures 47:269-275. resolves to Sherief, El-Sayed and Abd El-Latief, "Fractional order theory of thermoelasticity", IJSS 47, 269-275 (2010) - the register carries the page range 585-590, which is wrong

#79 van der Merwe, van Rensburg and Sieberhagen 2021 (Appl. Math. Comput.). this DOI resolves to Liu, Nurmamat and Zhang, "Arbitrary partitionability of product graphs", Appl. Math. Comput. 408 (2021) - not this work; Crossref finds only one 2021 paper by van der Merwe, van Rensburg and Sieberhagen (10.1016/j.amc.2020.125934), so this row may duplicate it

What the check does and does not say. Each DOI was queried against the Crossref REST API on 2026-11-01 and the returned title, journal, volume and year were compared with the citation in the manuscript register. "yes" means the DOI resolves to the work named in that row. It does not mean the manuscript's own citation details are perfect - where a page range or a year differs, the row above records it. For the sixteen works with no DOI, nothing was invented: they are older papers and books that predate DOI registration, and the volume and page numbers in the citation are what a library would need.
